

Angles - Multiple Rays

Find the measure of given angles using protractor.

1)

a) $\angle JOM =$ _____

d) $\angle KOM =$ _____

b) $\angle MON =$ _____

e) $\angle LON =$ _____

c) $\angle JOK =$ _____

f) $\angle KOL =$ _____

2)

a) $\angle EOF =$ _____

d) $\angle FOH =$ _____

b) $\angle DOG =$ _____

e) $\angle DOH =$ _____

c) $\angle DOE =$ _____

f) $\angle GOH =$ _____

Answer Key

Find the measure of given angles using protractor.

1)

a) $\angle JOM = \underline{127^\circ}$

d) $\angle KOM = \underline{79^\circ}$

b) $\angle MON = \underline{53^\circ}$

e) $\angle LON = \underline{90^\circ}$

c) $\angle JOK = \underline{48^\circ}$

f) $\angle KOL = \underline{42^\circ}$

2)

a) $\angle EOF = \underline{63^\circ}$

d) $\angle FOH = \underline{92^\circ}$

b) $\angle DOG = \underline{144^\circ}$

e) $\angle DOH = \underline{180^\circ}$

c) $\angle DOE = \underline{25^\circ}$

f) $\angle GOH = \underline{36^\circ}$
