

Name _____

Date _____

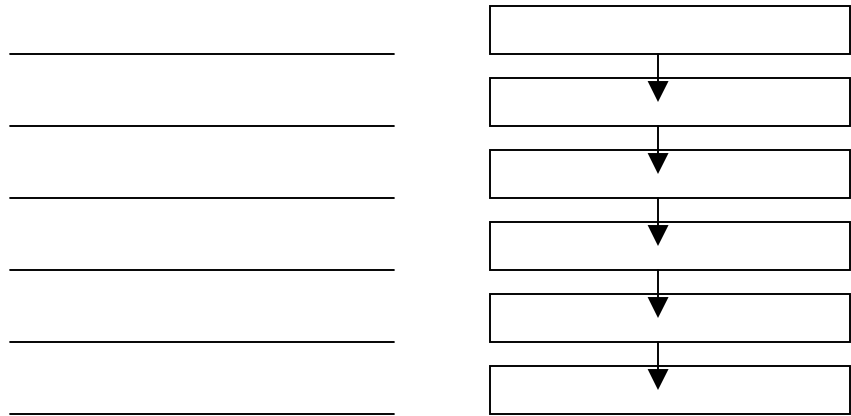

Notes: Earth Systems

Earth Systems

This chart illustrates the interactions between the Earth's systems and an example of each.

An event in one of the systems can have unexpected effects on other systems. A flow chart can be helpful showing this:

Why can't you predict the exact spot a leaf thrown into a stream will eventually end up? _____

This idea is referred to as _____

These are some questions or thoughts I have about the lesson:
