

While memorization isn't really science, it certainly helps in science to know what you're working with. In this course, we work with planet Earth. How well do you know the features and coordinates of your home planet?
Date _____ Per. _____

1. Label the following coordinate features on our planet:

- | | |
|------------------------|-------------------------------|
| A. Equator | E. Antarctic Circle |
| B. Tropic of Cancer | F. Prime Meridian |
| C. Tropic of Capricorn | G. Line of 90° West Longitude |
| D. Arctic Circle | H. Line of 40° North Latitude |

2. On the same map, label the following geographic features:

- | | |
|------------------|-------------------|
| A. North America | F. Europe |
| B. South America | G. Antarctica |
| C. Africa | H. Atlantic Ocean |
| D. Asia | I. Pacific Ocean |
| E. Australia | J. Indian Ocean |

3. Mark an "X" at the location of your community.

4. What is the difference between "latitude" and "latitude line?"

5. Why aren't the North and South Poles shown on this map?
