

Name _____

--	--	--	--	--	--

Date _____

Notes: Weather
Locations of Clouds and Precipitation

This is what is required to form clouds: _____

What is the relationship between temperature and dew point where clouds form? _____

How is the air temperature able to cool? _____

What prevents water droplets from falling from the clouds? _____

Why do water droplets or ice crystals eventually fall as rain, snow, sleet, or hail? _____

Locations where air rises:

1. _____	2. _____
3. _____	
4. _____ (see page. _____ in the ESRT)	

These are some questions I have about this lesson:
