**Field Study**

It is important for students at this level to be exposed to the world of art and realize that there is a very wide variety of work to explore. Field trips are very important teaching tools. Trips to local galleries are recommended:

- Vassar College has an excellent collection and an interesting opportunity to interact with college age students studying the arts (the college provides a student Docent).
- SUNY New Paltz is also a great opportunity. It is close and could be visited in one block's time.
- Olana State Park was the home of Hudson Valley artist Frederick Church. This trip creates an interesting opportunity for students to learn about how artists live, as well as make a living off of their art. It also allows students the opportunity to work on location (outside) and recreate some of the scenes they may have seen in the artist's home.

**Homework**

Much of this class is geared toward teaching proper technique. Homework is an excellent opportunity for students to incorporate the techniques that they are learning into their own unique style. It reinforces the skills learned in class and helps broaden the scope of the class. Students are often asked to do their own research on various artists and artistic styles. It is also very important for an artist to be working on a regular basis; homework provides a structure for students to do so, as well as helps to create some artistic discipline. The pieces created at home are just as important as the work done in class. The pieces are expected to be complete and portfolio worthy.

**Critique**

It is very important for students to be able to properly evaluate a piece of art. There should be regular critique of art works, both student and professional pieces.
