

New Terminal Server

New Feature: Will allow access to your home peripheral (i.e. printers, external drives including flash drives)

Logging in: There are two things you need to know about the new Terminal Server.

1. If your login doesn't work, preface your username with NPCSD\ (i.e. NPCSD\jvalk).

2. Some computers may get a warning about the Certificate on the terminal server. If they click "Do not warn me about this again" and then Yes, they will not see this on future log-ons.
