

**Mac OS X Mountain Lion users:** Remote Desktop Connection (RDC) does not work with our terminal server. The workaround (until Apple fixes RDC) is to use a program called “CoRD”.

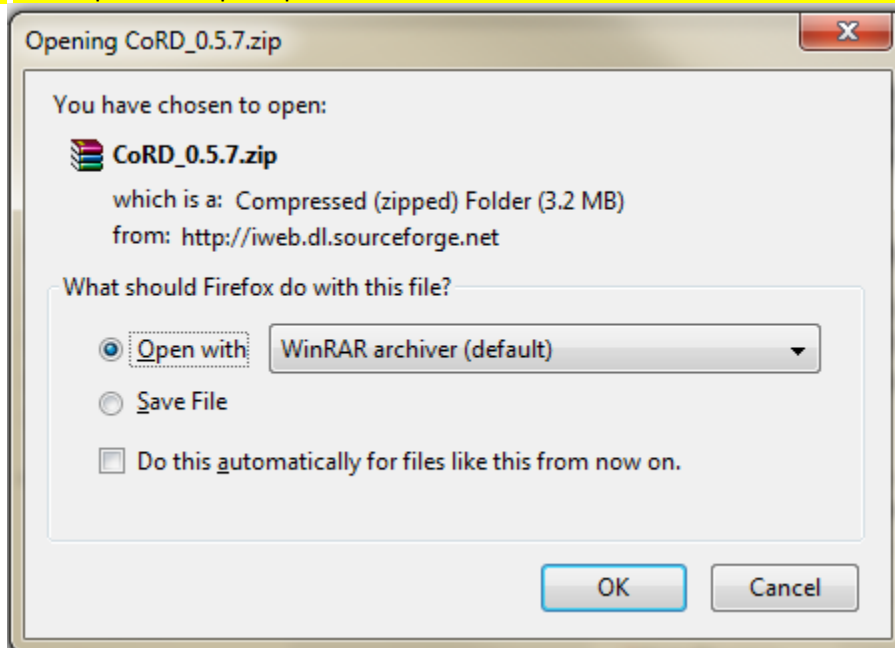

- 1) Go to <http://cord.sourceforge.net/>
- 2) Click on the Download CoRD 0.5.7 button

↓ Download CoRD 0.5.7

- 3) Wait for the download to start

- 4) Click Open when prompted to save the file and follow the install instructions.

- 5) Our terminal server address is ts.newpaltz.k12.ny.us
