Impact Report

Currently, the elementary school students begin their learning days after 9:00AM and conclude after 3:00PM. A shift in these times would not substantively impact the schedule during the learning day. The greatest impact felt by the elementary community would be familial as pre and post school supervision needs would change dramatically.

Modified

- Before and after school care – this might pose issues with private providers and high school students providing supervision for elementary students/siblings (family cost considerations)
- Opportunity for high school – elementary school collaboration (ex.: student mentoring during elementary events such as the Hour of Code, Green Classroom activities, and special classroom projects)
- Shared staff scheduling between elementary and secondary schools
- Field trip venues
